WORK EXPERIENCE

Salesforce Developer

Kiva Infotech

01/2024 - Present

Surat, Gujarat

Achievements/Tasks

- Developed and customized Salesforce applications using Apex, Lightning Web Components (LWC)
- Integrated REST APIs to fetch real-time data into Salesforce
- Designed and implemented Flows, Process Builder, and Workflow Rules to automate business processes
- Created custom objects, fields, validation rules, and page layouts to enhance data management
- Worked with profiles, permission sets, and role hierarchies to ensure secure data access
- Optimized SOQL and SOSL queries for efficient data retrieval

Data Science Intern

Techdata Solution

06/2022 - 12/2023

Pune, Maharashtra

Achievements/Tasks

- During My Internship, I had the opportunity to work on a variety of tasks, which allowed me to develop my skills and knowledge in several areas of Data science. Some of the key things I Worked during my Internship include:
- Python Libraries
- Machine Learning Models
- Tableau

EDUCATION

Bachelor of Computer Applications

Shri Shambhubhai V Patel College of Computer Science and Business Management, Surat.

06/2019 - 02/2022

6.21

Courses

- In college I created Tutsy Delight Bakery website. Tutsy Delight Bakery is a dynamic PHP-based website designed to streamline online bakery orders and enhance customer experience. Built with PHP, SQL, JavaScript, HTML, and CSS, the platform allows users to browse products, place orders, and manage inventory efficiently.

PROJECTS

Global News REST-API Integration (LWC)

- This Salesforce integration fetches real-time global news using a REST API. Built with Apex HTTP callouts, it retrieves news articles based on category and country, processes JSON responses, and displays relevant details like titles, descriptions, and images. The integration enhances Salesforce by providing up-to-date news insights directly within the platform.

Black Friday Sales Prediction Analysis

- This project was undertaken to predict the sales on black Friday and understand the customer purchase behavior based on various product of different categories. Also, build Linear regression and Decision tree model to predict purchase amount
